ABOUT ME

Junior Mathematics with Computer Science student at KMUTNB with a 3.76 GPA. I have a strong background in mathematics and logic, with a specific interest in Data Engineering and Database Management. I'm comfortable designing schemas, writing complex SQL queries, and coding in Python/C#. I want to intern in a role where I can work with data pipelines and backend systems.

TOOLS & FRAMEWORKS & PROGRAMMING LANGUAGES

LANGUAGE SKILLS

Thai
  Native
English
  Conversational(B1)
Chinese
  Basic

PERSONAL SKILLS

- Creative Thinking
- Critical Thinking
- Resilience / Patience
- Attention to Detail
- Problem-Solving
- Fast Learner & Adaptability
- Time Management
- Teamwork & Collaboration

ACADEMIC PROJECTS

ONLINE SHOE STORE (WEB APP)

- Developed a full-stack e-commerce app using React, TypeScript, Tailwind.
- Designed UI/UX and implemented shopping cart logic.

PET SHOP DATABASE SYSTEM

- Designed ER Diagram and Database Schema for inventory management.
- Built backend connectivity using C# and SQL.

SEMINAR IN DEEP LEARNING & DISASTER PREDICTION

- Studied: River Flooding Forecasting & Anomaly Detection.
- Key Takeaways: Explored how Deep Learning models (like LSTM or RNN) are used to predict water levels and detect anomalies in time-series data.
- Skill Gained: Gained a strong understanding of predictive modeling and handling complex environmental datasets.
